DETAILED ACTION***Response to Amendment***

The reply filed on March 22, 2004 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): The claims as originally presented cite “a system and a method for providing investment advice to investors” whereas the amended claims recite “a system and a method for generating and adaptively updating a customized portfolio of trade recommendations”. Also amended claims include the steps of “receiving over a computer network a plurality of investment strategies from a plurality of investment advisors, each of the investment strategies being updated periodically and including a plurality of trade recommendations wherein each of the trade recommendations specifies a financial instrument and terms necessary for trading the financial instrument in a respective financial market”, “applying investor-defined management weights to the investment strategies to generate a weighted portfolio of trade recommendations, the management weights defining the percentage of investor portfolio funds available for investing in the subscribed investment strategies” and “delivering the weighted portfolio of trade recommendations to the investor over the computer network during a trade recommendation distribution period” which are not present in the original claims. Hence it is clear that the two methods are different in scope and utility. From the discussions above and as explained by the examiner to the applicant’s representative during the interview on March 3, 2004, the two methods are distinct and different inventions. See 37 CFR 1.111. Also the two inventions require substantially different searches. The applicant elected the former invention by original presentation. The rejection of the original claims as discussed in the office action stands. (See MPEP

EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).
